**PETITION UNDER 37 C.F.R. § 1.181(a) TO WITHDRAW A HOLDING OF
ABANDONMENT – NO FEE REQUIRED**

Mail Stop Petitions
Commissioner for Patents
P.O. Box 1450
Alexandria, VA 22313-1450

NEEDLE & ROSENBERG, P.C.
Customer Number 23859

Pursuant to 37 C.F.R. § 1.181(a) and M.P.E.P. § 711.03(c) I, Applicants hereby petition for withdrawal of the holding of abandonment communicated by Examiner Ramillano by telephone on May 22, 2008 to the Applicants’ attorney. Applicants submit that the present application was not abandoned and the abandonment was issued in error. Examiner Ramillano communicated to Applicants that the case was abandoned because Applicants failed to timely respond to the Notice of Non-Compliant Amendment issued on November 29, 2007.

Applicants contend that the case has been abandoned in error because the Notice of Non-Compliant Amendment was never received by the Applicants or the Applicants’ attorneys.

Statement of Facts

Needle & Rosenberg PC (Applicants' counsel, referred to hereinafter as "Counsel") submitted a "Revocation of Prior Power of Attorney, Appointment of New Power of Attorney Statement" on September 24, 2007 (see attached copy of Revocation of Prior Power of Attorney, Appointment of New Power of Attorney Statement). The Revocation of Prior Power of Attorney, Appointment of New Power of Attorney Statement was entered into the File Wrapper on September 24, 2007 (See copy of File Wrapper printed from PAIR). On October 1, 2007, the Patent Office issued a "Notice of Acceptance of Power of Attorney," which stated that "Correspondence in this application will be mailed to the above address provided by 37 CFR 1.33." (See copy of File Wrapper printed from PAIR.) The address listed in the Notice of Acceptance of Power of Attorney is "Needle & Rosenberg, P.C. Suite 1000, 999 Peachtree St., Atlanta, GA 30309-3915" (See attached copy of Notice of Acceptance of Power of Attorney). This is the address of Counsel.

Counsel submitted a "Response to the Office Action" on October 23, 2007 (see attached copy of Response to the Office Action). This Response to the Office Action was entered into the File Wrapper on October 23, 2007 (see copy of File Wrapper printed from PAIR). On October 29, 2007, the Patent Office issued a Notice of Non-Compliant Amendment (See copy of File Wrapper printed from PAIR). The Notice of Non-Compliant Amendment states that failure to timely respond to the notice will result in the abandonment of the application (see attached copy of Notice of Non-Compliant Amendment). Counsel did not receive the Notice of Non-Compliant Amendment.

For the reasons set forth herein, Applicants submit that the Notice of Non-Compliant Amendment was not received and the abandonment was issued in error.

M.P.E.P. 711.03(c) I A provides the following:

A. Petition To Withdraw Holding of Abandonment Based on Failure To Receive Office Action

In *Delgar v. Schulyer*, 172 USPQ 513 (D.D.C. 1971), the court decided that the Office should mail a new Notice of Allowance in view of the evidence presented in support of the contention that the applicant's representative did not receive the original Notice of Allowance. Under the reasoning of *Delgar*, an allegation that an Office action was never received may be considered in a petition to withdraw the holding of abandonment. If adequately supported, the Office may grant the petition to withdraw the holding of abandonment and remail the Office action. That is, the reasoning of *Delgar* is applicable regardless of whether an application is held abandoned for failure to timely pay the issue fee (**35 U.S.C. 151**) or for failure to prosecute (**35 U.S.C. 133**).

To minimize costs and burdens to practitioners and the Office, the Office has modified the showing required to establish nonreceipt of an Office action. The showing required to establish nonreceipt of an Office communication must include a statement from the practitioner describing the system used for recording an Office action received at the correspondence address of record with the USPTO. The statement should establish that the docketing system is sufficiently reliable. It is expected that the record would include, but not be limited to, the application number, attorney docket number, the mail date of the Office action and the due date for the response.

Practitioner must state that the Office action was not received at the correspondence address of record, and that a search of the practitioner's record(s), including any file jacket or the equivalent, and the application contents, indicates that the Office action was not received. A copy of the record(s) used by the practitioner where the non-received Office action would have been entered had it been received is required.

A copy of the practitioner's record(s) required to show non-receipt of the Office action should include the master docket for the firm. That is, if a three month period for reply was set in the nonreceived Office action, a copy of the master docket report showing all replies docketed for a date three months from the mail date of the nonreceived Office action must be submitted as documentary proof of nonreceipt of the Office action. If no such master docket exists, the practitioner should so state and provide other evidence such as, but not limited to, the following: the application file jacket; incoming mail log; calendar; reminder system; or the individual docket record for the application in question.<

The showing outlined above may not be sufficient if there are circumstances that point to a conclusion that the Office action may have been lost after receipt rather than a conclusion that the Office action was lost in the mail (e.g., if the practitioner has a history of not receiving Office actions).

Evidence of nonreceipt of an Office communication or action (e.g., Notice of Abandonment or an advisory action) other than that action to which reply was required to avoid abandonment would not warrant withdrawal of the holding of abandonment. Abandonment takes place by operation of law for failure to reply to an Office action or

timely pay the issue fee, not by operation of the mailing of a Notice of Abandonment. See *Lorenz v. Finkl*, 333 F.2d 885, 889-90, 142 USPQ 26, 29-30 (CCPA 1964); *Krahn v. Commissioner*, 15 USPQ2d 1823, 1824 (E.D. Va 1990); *In re Application of Fischer*, 6 USPQ2d 1573, 1574 (Comm'r Pat. 1988).

In light of the above, and in fulfillment of the requirements of M.P.E.P. 711.03(c) I A, Counsel for the Applicants attest to the following:

- (1) Counsel maintains a reliable docketing system. All correspondence from the Patent Office is routed to a Docketing Department and all Office Actions are docketed with at least a date of receipt and a due date.
- (2) Counsel assigned a client/matter number of 21101.0111U2 to the present application, application serial no. 09/973,557. Counsel's docketing system relates the application serial number to the assigned client/matter number.
- (3) Counsel attests that a search of the file jacket and docket record indicates that a Notice Non-Compliant Amendment was not received in this application. Counsel submits a copy of the docket record for this matter and reports over a six month period of daily actions due starting on November, 2007 to show that the Notice was not received or docketed. Daily Patent Actions Due are created by Counsel's docketing system in response to mailings received from the United States Patent and Trademark Office.
- (4) The entire delay in filing the required reply from the due date of the reply until the filing of this response was unavoidable as the Applicants or Counsel did not receive the Notice of Non-Compliant Amendment.

In view of these showings, Applicants believe withdrawal of the holding of abandonment would be proper. Thus, Applicants respectfully request withdrawal of the holding of abandonment in the present application.

Favorable consideration of this Petition is earnestly solicited.

Applicants hereby concurrently submit the corrected response to the Office action dated May 2, 2007 in fulfillment of the Notice of Non-Compliant Amendment issued by the Patent Office on October 29, 2007.

It is believed that no fee is due with this Petition because Applicants contend that the application is not abandoned (see M.P.E.P. § 711.03(c)I). In the event that it is determined that a fee is due, the Commissioner is hereby authorized to charge the fee to Deposit Account No. 14-0629.

Respectfully submitted,

Sir:

STATEMENT UNDER 3.73(b)

University of Utah Research Foundation, a Utah non-profit company, states that it is the Assignee of the entire right, title and interest in the patent application identified above as evidenced by the following chain of title:

From: REICHERT, W. MONTY

To: Duke University
Recorded at Reel 7600/Frame 0086

From: DUKE UNIVERSITY
HERRON, James N.
CHRISTENSEN, Douglas A.
WANG, Hsu-Kun

To: University of Utah
Recorded at Reel 7600/Frame 0076

From: UNIVERSITY OF UTAH

To: University of Utah Research Foundation
Recorded at Reel 7826/Frame 0668

REVOCATION OF PRIOR POWER OF ATTORNEY

As a representative authorized to act on behalf of University of Utah Research Foundation, I hereby revoke all Powers of Attorney previously given.

NEW POWER OF ATTORNEY

The following attorneys/agents are hereby appointed to represent the above-identified Assignee in connection with all matters pertaining to the above-referenced application, with full power of substitution, association and revocation, to prosecute said application and to transact all business in the U.S. Patent and Trademark Office connected therewith.

The attorneys/agents associated with **Customer No. 23859**

Address all telephone calls to David E. Huizenga at (678) 420-9300.

Address all correspondence to the address of record for the following Customer Number:

Customer No. 23859

The undersigned (whose title is supplied below) is authorized to act on behalf of the Assignee.

UNIVERSITY OF UTAH RESEARCH FOUNDATION

RESPONSE TO THE OFFICE ACTION

MAIL STOP AMENDMENT
Commissioner for Patents
P.O. Box 1450
Alexandria, VA 22313-1450

NEEDLE & ROSENBERG, P.C.
Customer No. 23859

Sir:

In response to the non-final Office Action mailed May 2, 2007, please enter the following amendment in the application and consider the following remarks:

Amendments to the claims begin on page 2.

Remarks begin on page 15.

A **Request for a Three-Month Extension of Time** is attached to this paper.

Amendments to the Claims

1. (Currently Amended) An apparatus for performing a specific binding assay, the apparatus comprising:

a composite waveguide comprising:

a substrate comprising a first optical material of refractive index n_1 and having a first planar surface and an opposite second surface, and

a waveguide film comprising a second optical material having a refractive index n_2 which is greater than refractive index n_1 , said waveguide film disposed on said first planar surface of said substrate;

capture molecules, associated with said waveguide film, for interacting selectively with at least one type of selected analyte molecule;

a light source operably disposed to direct a light beam into said composite waveguide for propagation by total internal reflection therein; and

a light detection device positioned to collect light emitted from a surface of said waveguide film; and

an optical coupling element comprised of a waveguide coupler disposed on an upper surface of said waveguide film and opposite said first planar surface of said substrate, wherein said waveguide coupler is further comprised of an input waveguide that is comprised of an optical material having a refractive index n_3 and a thickness of between about 0.5 mm and about 5 mm and a precise spacing layer to evanescently couple light into said waveguide film across said precise spacing layer, said spacing layer comprises an optical material having a refractive index n_4 , where $n_4 < n_2$ and $n_4 < n_3$.

11. (Original) The apparatus of claim 9, wherein said input waveguide comprises an optical material having a refractive index n_3 and a thickness of between about 0.5 mm and about 5 mm.

12. (Previously Presented) The apparatus of claim 11, wherein said spacing layer comprises an optical material having a refractive index n_4 , where $n_4 < n_2$ and $n_4 < n_3$, said spacing layer having a thickness selected to optimize evanescent coupling of light from said input waveguide into said waveguide film.

2. (Previously Presented) The apparatus of claim 1, wherein said light detection device is positioned to detect light passing through said opposite second surface of said substrate of said composite waveguide.

3. (Canceled)

4. (Currently Amended) The apparatus of claim [[3]] 1, wherein said optical coupling element comprises at least one prism that focuses light into said waveguide film.

5. (Currently Amended) The apparatus of claim [[3]] 1, wherein said optical coupling element comprises a diffraction grating that diffracts light into said waveguide film.

6. (Original) The apparatus of claim 5, wherein said diffraction grating is formed into said waveguide film at an upper surface thereof, opposite said first planar surface of said substrate.

7. (Original) The apparatus of claim 5, wherein said diffraction grating is formed into at least one of said first planar surface of said substrate and a surface of said waveguide film adjacent to said first planar surface.

- 8. (Canceled)
- 9. (Canceled)
- 10. (Canceled)
- 11. (Canceled)
- 12. (Canceled)
- 13. (Original) The apparatus of claim 1, wherein said substrate has a thickness of at least about 10 μm .
- 14. (Original) The apparatus of claim 1, wherein said waveguide film has a thickness of at least about 0.1 μm .
- 15. (Original) The apparatus of claim 1, wherein said first optical material comprises at least one of silicon dioxide, quartz, fused silica, silicon oxynitride, and magnesium fluoride.
- 16. (Original) The apparatus of claim 1, wherein said second optical material comprises at least one of silicon oxynitride and silicon dioxide.
- 17. (Original) The apparatus of claim 1, wherein said light source comprises a laser.
- 18. (Previously Presented) The apparatus of claim 1, wherein said light detection device comprises a charge-coupled device.

19. (Original) The apparatus of claim 1, wherein said composite waveguide further comprises a sample reservoir configured to contain a sample solution adjacent to a surface of said waveguide film.

20. (Previously presented) The apparatus of claim 19, wherein said sample reservoir contains a sample solution comprising a plurality of molecules of a selected analyte and a plurality of tracer molecules, said tracer molecules being activated by evanescent light escaping from said waveguide film into said sample solution.

21. (Original) The apparatus of claim 1, wherein said capture molecules are of a plurality of different types.

22. (Previously Presented) The apparatus of claim 21, wherein said different types of said capture molecules are positioned at discrete locations from one another on a surface of said waveguide film.

23. (Original) The apparatus of claim 22, wherein said discrete locations are arranged in an array.

24. (Original) The apparatus of claim 21, wherein said different types of capture molecules are capable of reacting with at least two different analytes.

25. (Original) The apparatus of claim 21, wherein said different types of capture molecules are capable of reacting with at least four different analytes.

64. (Previously Presented) An apparatus for performing a specific binding assay, the apparatus comprising:

a composite waveguide comprising:

a substrate comprising a first optical material of refractive index n , and having a first planar surface and an opposite second surface, and

a waveguide film comprising a second optical material having a refractive index n_2 which is greater than refractive index n , said waveguide film disposed on said first planar surface of said substrate;

capture molecules, associated with said waveguide film, for interacting selectively with at least one type of selected analyte molecule;

a light source operably disposed to direct a light beam into said composite waveguide for propagation by total internal reflection therein;

an optical coupling element comprising a waveguide coupler:

disposed on an upper surface of said waveguide film, opposite said first planar surface of said substrate,

that directs light into said waveguide film by evanescent coupling, and

that includes an input waveguide and a spacing layer to evanescently couple light into said waveguide film across said spacing layer, the input waveguide comprising an optical material having a refractive index n , and a thickness of between about 0.5 mm and about 5 mm; and

a light detection device positioned to collect light emitted from a surface of said waveguide film.

65. (Previously Presented) The apparatus of claim 64, wherein said light detection device is positioned to detect light passing through said opposite second surface of said substrate of said composite waveguide.

66. (Previously Presented) The apparatus of claim 64, wherein said optical coupling element comprises at least one prism that focuses light into said waveguide film.

67. (Previously Presented) The apparatus of claim 64, wherein said optical coupling element comprises a diffraction grating that diffracts light into said waveguide film.

68. (Previously Presented) The apparatus of claim 67, wherein said diffraction grating is formed into said waveguide film at an upper surface thereof, opposite said first planar surface of said substrate.

69. (Previously Presented) The apparatus of claim 67, wherein said diffraction grating is formed into at least one of said first planar surface of said substrate and a surface of said waveguide film adjacent to said first planar surface.

70. (Previously Presented) The apparatus of claim 64, wherein said spacing layer comprises an optical material having a refractive index n_4 , where $n_4 < n$, and $n_4 < n$, said spacing layer having a thickness selected to optimize evanescent coupling of light from said input waveguide into said waveguide film.

71. (Previously Presented) The apparatus of claim 64, wherein said waveguide film has a thickness of at least about 0.1 μm .

72. (Previously Presented) The apparatus of claim 64, wherein said first optical material comprises at least one of silicon dioxide, quartz, fused silica, silicon oxynitride, and magnesium fluoride.

73. (Previously Presented) The apparatus of claim 64, wherein said second optical material comprises at least one of silicon oxynitride and silicon dioxide.

74. (Previously Presented) The apparatus of claim 64, wherein said light source comprises a laser.

75. (Previously Presented) The apparatus of claim 64, wherein said light detection device comprises a charge-coupled device.

76. (Previously Presented) The apparatus of claim 64, wherein said composite waveguide further comprises a sample reservoir configured to contain a sample solution adjacent to a surface of said waveguide film.

77. (Previously Presented) The apparatus of claim 76, wherein said sample reservoir contains a sample solution comprising a plurality of molecules of a selected analyte and a plurality of tracer molecules, said tracer molecules being activated by evanescent light escaping from said waveguide film into said sample solution.

78. (Previously Presented) The apparatus of claim 64, wherein said capture molecules are of a plurality of different types.

79. (Previously Presented) The apparatus of claim 78, wherein said different types of said capture molecules are positioned at discrete locations from one another on a surface of said waveguide film.

80. (Previously Presented) The apparatus of claim 79, wherein said discrete locations are arranged in an array.

81. (Previously Presented) The apparatus of claim 78, wherein said different types of capture molecules are capable of reacting with at least two different analytes.

82. (Previously Presented) The apparatus of claim 78, wherein said different types of capture molecules are capable of reacting with at least four different analytes.

83. (Currently Amended) An apparatus for performing a specific binding assay, the apparatus comprising:

a composite waveguide comprising:

a substrate comprising a first optical material of refractive index n , and having a first planar surface and an opposite second surface, and

a waveguide film comprising a second optical material having a refractive index n_2 which is greater than refractive index n , said waveguide film disposed on said first planar surface of said substrate;

capture molecules, associated with said waveguide film, for interacting selectively with at least one type of selected analyte molecule;

a light source operably disposed to direct a light beam into said composite waveguide for propagation by total internal reflection therein; and

a light detection device positioned to collect light emitted from a surface of said waveguide film; ~~and~~

a sample reservoir configured to contain a sample solution adjacent to a surface of said waveguide film; and

an optical coupling element comprised of a waveguide coupler disposed on an upper surface of said waveguide film and opposite said first planar surface of said substrate,

wherein said waveguide coupler is further comprised of an input waveguide that is comprised of an optical material having a refractive index n_3 and a thickness of between about 0.5 mm and about 5 mm and a precise spacing layer to evanescently couple light into said waveguide film across said precise spacing layer, said spacing layer comprises an optical material having a refractive index n_4 , where $n_4 < n_2$ and $n_4 < n_3$.

84. (Previously Presented) The apparatus of claim 83, wherein said light detection device is positioned to detect light passing through said opposite second surface of said substrate of said composite waveguide.

85. (Canceled)

86. (Currently Amended) The apparatus of claim [[85]] 83, wherein said optical coupling element comprises at least one prism that focuses light into said waveguide film.

87. (Currently Amended) The apparatus of claim [[85]] 83, wherein said optical coupling element comprises a diffraction grating that diffracts light into said waveguide film.

88. (Previously Presented) The apparatus of claim 87, wherein said diffraction grating is formed into said waveguide film at an upper surface thereof, opposite said first planar surface of said substrate.

89. (Previously Presented) The apparatus of claim 87, wherein said diffraction grating is formed into at least one of said first planar surface of said substrate and a surface of said waveguide film adjacent to said first planar surface.

90. (Canceled)

91. (Canceled)

- 92. (Canceled)
- 93. (Previously Presented) The apparatus of claim 83, wherein said waveguide film has a thickness of at least about 0.1 μm .
- 94. (Previously Presented) The apparatus of claim 83, wherein said first optical material comprises at least one of silicon dioxide, quartz, fused silica, silicon oxynitride, and magnesium fluoride.
- 95. (Previously Presented) The apparatus of claim 83, wherein said second optical material comprises at least one of silicon oxynitride and silicon dioxide.
- 96. (Previously Presented) The apparatus of claim 83, wherein said light source comprises a laser.
- 97. (Previously Presented) The apparatus of claim 83, wherein said light detection device comprises a charge-coupled device.
- 98. (Previously Presented) The apparatus of claim 83, wherein said capture molecules are of a plurality of different types.
- 99. (Previously Presented) The apparatus of claim 98, wherein said different types of said capture molecules are positioned at discrete locations from one another on a surface of said waveguide film.
- 100. (Previously Presented) The apparatus of claim 99, wherein said discrete locations are arranged in an array.

101. (Previously Presented) The apparatus of claim 98, wherein said different types of capture molecules are capable of reacting with at least two different analytes.
102. (Previously Presented) The apparatus of claim 98, wherein said different types of capture molecules are capable of reacting with at least four different analytes.
103. (Currently Amended) An apparatus for performing a specific binding assay, the apparatus comprising:
a composite waveguide comprising:
a substrate comprising a first optical material of refractive index n_1 , and having
a first planar surface and an opposite second surface, and
a waveguide film comprising a second optical material having a refractive index n_2
which is greater than refractive index n_1 , said waveguide film disposed on
said first planar surface of said substrate;
a plurality of different types of capture molecules associated with said waveguide film,
each type of capture molecules configured to interact selectively with at least one
type of selected analyte molecule, different types of capture molecules of said
plurality positioned at discrete locations from one another and arranged in an array
on a surface of said waveguide film;
a light source operably disposed to direct a light beam into said composite
waveguide for propagation by total internal reflection therein; ~~and~~
a light detection device positioned to collect light emitted from a surface of said
waveguide film; and
an optical coupling element comprised of a waveguide coupler disposed on an upper
surface of said waveguide film and opposite said first planar surface of said
substrate, wherein said waveguide coupler is further comprised of an input
waveguide that is comprised of an optical material having a refractive index n_3 and
a thickness of between about 0.5 mm and about 5 mm and a precise spacing layer to
evanescently couple light into said waveguide film across said precise spacing

layer, said spacing layer comprises an optical material having a refractive index n_4 , where $n_4 < n_2$ and $n_4 < n_3$.

104. (Previously Presented) The apparatus of claim 103, wherein said light detection device is positioned to detect light passing through said opposite second surface of said substrate of said composite waveguide.
105. (Canceled)
106. (Currently Amended) The apparatus of claim ~~[[105]]~~ 103, wherein said optical coupling element comprises at least one prism that focuses light into said waveguide film.
107. (Currently Amended) The apparatus of claim ~~[[105]]~~ 103, wherein said optical coupling element comprises a diffraction grating that diffracts light into said waveguide film.
108. (Previously Presented) The apparatus of claim 107, wherein said diffraction grating is formed into said waveguide film at an upper surface thereof, opposite said first planar surface of said substrate.
109. (Previously Presented) The apparatus of claim 107, wherein said diffraction grating is formed into at least one of said first planar surface of said substrate and a surface of said waveguide film adjacent to said first planar surface.
110. (Canceled)
111. (Canceled)
112. (Canceled)

- 113. (Previously Presented) The apparatus of claim 103, wherein said waveguide film has a thickness of at least about 0.1 μm .
- 114. (Previously Presented) The apparatus of claim 103, wherein said first optical material comprises at least one of silicon dioxide, quartz, fused silica, silicon oxynitride, and magnesium fluoride.
- 115. (Previously Presented) The apparatus of claim 103, wherein said second optical material comprises at least one of silicon oxynitride and silicon dioxide.
- 116. (Previously Presented) The apparatus of claim 103, wherein said light source comprises a laser.
- 117. (Previously Presented) The apparatus of claim 103, wherein said light detection device comprises a charge-coupled device.

REMARKS

Claims 1-25, and 64-117 are pending in the application. In this response, claims 3, 8-12, 85, 90-92, 105 and 110-112 are canceled. Claims 1, 4, 5, 83, 86, 87, 103, 106 and 107 are amended. Claims 11, 12 and 64-82 have been allowed by the Examiner. No new matter is believed to be added by this amendment. Applicants submit that all of the claims are now in a form for allowance.

Applicants sincerely wish to thank the Examiner for the indicated allowance of claims 11, 12 and 64-82.

Claim Rejections – 35 U.S.C. § 102

In the Office Action, claims 1-5, 7, 8, 15-17, 21, 22, 24 and 25 were rejected under 35 USC 102(b) as being anticipated by Tiefenthaler et al. (USPN 5,071,248, “Tiefenthaler”).

In the Office Action, claims 1-10, 14, 15, 17, 21, 22, 24 and 25 were rejected under 35 USC 102(b) as being anticipated by Flanagan et al. (USPN 5,081,012, “Flanagan”).

In the Office Action, claims 1 and 13 were rejected under 35 USC 102(b) as being anticipated by Lukosz (USPN 5,120,131).

In the Office Action, claims 1-4, 8, 14, 15, 21, 22, 24 and 25 were rejected under 35 USC 102(e) as being anticipated by Attridge (USPN 5,344,784).

In the Office Action, claims 1-3, 8-10, 14-25, 83-85, 90-105, and 110-117 were rejected under 35 USC 102(e) as being anticipated by Groger et al. (USPN 5,577,137).

A proper rejection of a claim under 35 U.S.C. § 102 requires that a single prior art reference disclose each element of the claim. *See, e.g., W.L. Gore & Assoc., Inc. v. Garlock, Inc.*, 721 F.2d 1540, 220 USPQ 303, 313 (Fed. Cir. 1983). The test is the same for a process. Anticipation requires identity between the claimed process and a process of the prior art. The claimed process, including each step thereof, must have been described or embodied, either expressly or inherently, in a single reference. *See, e.g., Glaverbel S.A. v. Northlake Mkt'g & Supp., Inc.*, 45 F.3d 1550, 33 USPQ2d 1496 (Fed. Cir. 1995). Those elements must either be inherent or disclosed expressly. *See,*

e.g., *Constant v. Advanced Micro-Devices, Inc.*, 848 F.2d 1560, 7 USPQ2d 1057 (Fed. Cir. 1988); *Verdegaal Bros., Inc. v. Union Oil Co.*, 814 F.2d 628, 2 USPQ2d 1051 (Fed. Cir. 1987). For anticipation, there must be no difference between the claimed invention and the reference disclosure, as viewed by a person of ordinary skill in the field of the invention. *See, e.g.*, *Scripps Clinic & Res. Found. v. Genentech, Inc.*, 927 F.2d 1565, 18 USPQ2d 1001 (Fed. Cir. 1991). In summary, the single prior art reference must properly disclose, teach or suggest each element of the claimed invention. Moreover, “every element of the claimed invention must be literally present, arranged as in the claim. ... The identical invention must be shown in as complete detail as is contained in the patent claim.” *See, e.g.*, *Richardson v. Suzuki Motor Company Co.* 868 F.2d 1226, 1236 (Fed. Cir. 1989).

As provided above, a claim can be anticipated only if each and every limitation of that claim is found in a single prior art reference. Applicants have amended independent claims 1, 83 and 103 to include an optical coupling element comprised of a waveguide coupler disposed on an upper surface of said waveguide film and opposite said first planar surface of said substrate, wherein said waveguide coupler is further comprised of an input waveguide that is comprised of an optical material having a refractive index n_3 and a thickness of between about 0.5 mm and about 5 mm and a precise spacing layer to evanescently couple light into said waveguide film across said precise spacing layer, said spacing layer comprises an optical material having a refractive index n_4 , where $n_4 < n_2$ and $n_4 < n_3$.

As none of the cite art references (i.e., Tiefenthaler, Flanagan, Lukosz, Attridge and Groger) teach or fairly suggest the above-described optical coupling element, alone or in combination, Applicants respectfully submit that claims 1, 83 and 103 are not anticipated by any of these references, and each are in a form for allowance. Similarly, as claims 2, 4-7, and 13-25 depend either directly or indirectly from allowable independent claim 1; claims 84, 86-89, and 93-102 depend either directly or indirectly from claim 83, and claims 104, 106-109 and 113-117 depend either directly or indirectly from claim 103, Applicants submit that these claims are also in a form for allowance. *See In re Fine*, 5 U.S.P.Q.2d 1569, 1600 (Fed. Cir. 1988) (“Dependent claims are

nonobvious under section 103 if the independent claims from which they depend are nonobvious.”). Using this same rationale, dependent claims cannot be anticipated if the independent claims from which they depend are not anticipated.

Claim Rejections – 35 U.S.C. § 103

Claims 86-89 and 106-109 were rejected under 35 USC 103(a) as being unpatentable over Groger in view of Koester (USPN 3,449,037).

Applicants first submit that, for a *prima facie* case of obviousness, the cited prior art references (when combined) “must teach or suggest all the claim limitations” MPEP § 2143. Thus, if the combination of references does not teach each of the claimed limitations, a finding of obviousness fails. In addition, the Patent Office has the burden under § 103 to establish a *prima facie* case of obviousness, which can be satisfied only by showing some objective teaching in the prior art would lead one to combine the relevant teachings of the references. See *In re Fine*, 837 F.2d 1071, 1074 (Fed. Cir. 1988). As such, an applicant, to overcome an allegation of obviousness, can show that the cited prior art references (when combined) do not teach or suggest all the claim limitations or that there is not an objective teaching in the prior art that would lead one to combine the relevant teachings of the references.

As claims 86-89 (that depend from allowable amended base claim 83) and claims 106-109 (that depend from allowable amended base claim 103) now include the limitation of an optical coupling element comprised of a waveguide coupler disposed on an upper surface of said waveguide film and opposite said first planar surface of said substrate, wherein said waveguide coupler is further comprised of an input waveguide that is comprised of an optical material having a refractive index n_3 and a thickness of between about 0.5 mm and about 5 mm and a precise spacing layer to evanescently couple light into said waveguide film across said precise spacing layer, said spacing layer comprises an optical material having a refractive index n_4 , where $n_4 < n_2$ and $n_4 < n_3$, which is not taught, suggested or made obvious by Groger or Koester, alone or in combination, Applicants submits these claims are now in a form for allowance. See *In re*

Fine, 5 U.S.P.Q.2d 1569, 1600 (Fed. Cir. 1988) (“Dependent claims are nonobvious under section 103 if the independent claims from which they depend are nonobvious.”).

Second, the Supreme Court has reaffirmed the *Graham* factors for determination of obvious under 35 U.S.C. 103(a). *KSR Int’l Co. v. Teleflex, Inc.* (*KSR*), No 04-1350 (U.S. Apr. 30, 2007). The four factual inquiries under *Graham* require examination of: (1) the scope and contents of the prior art; (2) the differences between the prior art and the claims in issue; (3) the level of ordinary skill in the pertinent art; and (4) the objective evidence of secondary consideration. *Graham v. John Deere (Graham)*, 383 U.S. 1, 17-18, 149 USPQ 459, 467 (1966); see also 35 U.S.C. § 103 (2000).

The Court has further recognized that the requirement for a teaching, suggestion or motivation, either in the references themselves or in the knowledge generally available to one of ordinary skill in the art, to modify the reference or to combine reference teachings, which was established by the Court of Customs and Patent Appeals, provides a helpful insight for determining whether the claimed subject matter is obvious under 35 U.S.C. § 103(a).

Where an invention is contended to be obvious based upon a combination of elements across different references, one should be able to identify particular reasons that would have prompted a person of ordinary skill in the relevant field to combine the [prior art] elements. *See, KSR Int’l Co.*, at 14, 15. This requirement prevents the use of “the inventor’s disclosure as a blueprint for piecing together the prior art to defeat patentability—the essence of hindsight.” *Ecolochem, Inc. v. So. Cal. Edison Co.*, 227 F.3d 1361, 1371-72 (Fed. Cir. 2000) (quoting *In re Dembiczak*, 175 F.3d 994, 999 (Fed. Cir. 1999)).

Applicants submit that the current construction of the cited references in the manner provided in the Office Action requires hindsight reasoning, which the Federal Circuit has explicitly rejected. *See In re Fritch*, 972 F.2d 1260, 23 U.S.P.Q.2d 1780, 1783 (Fed. Cir. 1992). As stated above, Groger and Koester, alone or in combination, do not teach the limitation of an optical coupling element comprised of a waveguide coupler disposed on an upper surface of said waveguide film and opposite said first planar surface of said substrate, wherein said waveguide coupler is further comprised of an input

waveguide that is comprised of an optical material having a refractive index n_3 and a thickness of between about 0.5 mm and about 5 mm and a precise spacing layer to evanescently couple light into said waveguide film across said precise spacing layer, said spacing layer comprises an optical material having a refractive index n_4 , where $n_4 < n_2$ and $n_4 < n_3$ as found in amended independent claims 83 and 103.. It would not have been obvious to one of ordinary skill in the art to combine Groger in view of Koester, and the subject matter of the limitations not taught by either, to arrive at the presently claimed invention. Applicants earnestly request reconsideration, withdrawal of this rejection, and allowance of claims 86-89 and 106-109.

Allowable Subject Matter

Applicants wish to express their appreciation to the Examiner for the indicated allowance of claims 11-12 and 64-82. Applicants note that claims 11-12 are rejected as depending from a rejected base claim, but would be allowable if rewritten in independent form to include all the limitations of the base claim and any intervening claims.

Analysis and Amendments

The Office Action indicates that the reason for allowance of claims 11, 12, and 64-82 is because the prior art of record does not teach or fairly suggest an input waveguide comprising an optical material having a refractive index n_3 and a thickness of between 0.5 mm and about 5 mm and a spacing layer comprising an optical material having a refractive index n_4 , where $n_4 < n_2$ and $n_4 < n_3$, the spacing layer having a thickness selected to optimize evanescent coupling of light from the input waveguide into the waveguide film.

Applicants respectfully submit that amended independent claims 1, 83, and 103 are now in a form for allowance in light of the stated reasons for allowance. Likewise, Applicants submit that the claims that depend from claims 1, 83 and 103, either directly or indirectly, are now in a form for allowance.

Conclusion

Claims 1-2, 4-7, 13-25, and 64-84, 86-89, 93-104, 106-109 and 113-117 remain pending in the patent application. Of these pending claims, claims 1, 64, 83 and 103 are independent claims. Because the Applicants respectfully assert that these independent claims are allowable, their dependent claims are also allowable. Thus, Applicants respectfully request allowance of all the pending claims in view of the subsequent remarks regarding the above-mentioned independent claims.

A Credit Card Payment in the amount of \$525.00 is enclosed for the Extension of Time. No other fee is believed due; however, the Commissioner is hereby authorized to charge any additional fees which may be required, or credit any overpayment to Deposit Account No. 14-0629.

Respectfully submitted,

NEEDLE & ROSENBERG, P.C.

The time period for reply, if any, is set in the attached communication.

Notice of Non-Compliant Amendment (37 CFR 1.121)

Application No.
09/973,557

Applicant(s)
REICHERT ET AL.

Art Unit
1600

-- The MAILING DATE of this communication appears on the cover sheet with the correspondence address --

The amendment document filed on 23 October, 2007 is considered non-compliant because it has failed to meet the requirements of 37 CFR 1.121 or 1.4. In order for the amendment document to be compliant, correction of the following item(s) is required.

THE FOLLOWING MARKED (X) ITEM(S) CAUSE THE AMENDMENT DOCUMENT TO BE NON-COMPLIANT:

- ☐ 1. Amendments to the specification:
 - ☐ A. Amended paragraph(s) do not include markings.
 - ☐ B. New paragraph(s) should not be underlined.
 - ☐ C. Other _____.
- ☐ 2. Abstract:
 - ☐ A. Not presented on a separate sheet. 37 CFR 1.72.
 - ☐ B. Other _____.
- ☐ 3. Amendments to the drawings:
 - ☐ A. The drawings are not properly identified in the top margin as "Replacement Sheet," "New Sheet," or "Annotated Sheet" as required by 37 CFR 1.121(d).
 - ☐ B. The practice of submitting proposed drawing correction has been eliminated. Replacement drawings showing amended figures, without markings, in compliance with 37 CFR 1.84 are required.
 - ☐ C. Other _____.
- ☒ 4. Amendments to the claims:
 - ☐ A. A complete listing of all of the claims is not present.
 - ☐ B. The listing of claims does not include the text of all pending claims (including withdrawn claims)
 - ☐ C. Each claim has not been provided with the proper status identifier, and as such, the individual status of each claim cannot be identified. Note: the status of every claim must be indicated after its claim number by using one of the following status identifiers: (Original), (Currently amended), (Canceled), (Previously presented), (New), (Not entered), (Withdrawn) and (Withdrawn-currently amended).
 - ☒ D. The claims of this amendment paper have not been presented in ascending numerical order.
 - ☒ E. Other: See Continuation Sheet.
- ☐ 5. Other (e.g., the amendment is unsigned or not signed in accordance with 37 CFR 1.4): For further explanation of the amendment format required by 37 CFR 1.121, see MPEP § 714.

TIME PERIODS FOR FILING A REPLY TO THIS NOTICE:

1. Applicant is given **no new time period** if the non-compliant amendment is an after-final amendment or an amendment filed after allowance, or a drawing submission (only) If applicant wishes to resubmit the non-compliant after-final amendment with corrections, the **entire corrected amendment** must be resubmitted.
2. Applicant is given **one month**, or thirty (30) days, whichever is longer, from the mail date of this notice to supply the correction, if the non-compliant amendment is one of the following: a preliminary amendment, a non-final amendment (including a submission for a request for continued examination (RCE) under 37 CFR 1.114), a supplemental amendment filed within a suspension period under 37 CFR 1.103(a) or (c), and an amendment filed in response to a Quayle action. If any of above boxes 1 to 4 are checked, the correction required is only the corrected section of the non-compliant amendment in compliance with 37 CFR 1.121.

Extensions of time are available under 37 CFR 1.136(a) only if the non-compliant amendment is a non-final amendment or an amendment filed in response to a Quayle action.

Failure to timely respond to this notice will result in:

Abandonment of the application if the non-compliant amendment is a non-final amendment or an amendment filed in response to a Quayle action; or

Non-entry of the amendment if the non-compliant amendment is a preliminary amendment or supplemental amendment.

Legal Instruments Examiner (LIE), if applicable Latima T. Owens

Telephone No: 571-272-0545

Continuation of 4. Other: Claim 11 and 12 are submitted after claim 1 then is cancelled on page 3 of claims.
